

Frontend Developer (Angular)

KSENIYA SYCHOVA

I have a solid base which was provided by the mentoring program, courses, an internship, and, especially, commercial projects.

During studying I have worked on commercial projects. Thanks to that I acquired not only good theoretical knowledge, but also put that into practice on real projects.

I'm striving to write a clean, readable code by following best practices. While doing so I'm collaborating closely with the team to make it best for all of us and help everyone improve and learn from each other.

I'm looking for a company in which I can show myself as a strong team player and contribute to worthwhile projects. I want to become a part of a powerful team to learn from while putting my best efforts into achieving team's goals.
