Git npm Agile Scrum

Figma Photoshop

Languages

English (Professional Working Proficiency — B2)

Russian (Native)

Education

RS School Frontend/Angular Course

Belarusian State University of Informatics and Radioelectronics

---

Frontend Developer (Angular)

Kseniya Sychova

As a frontend developer, I prioritize writing clean and readable code and mentoring new developers. In my almost 2 years of commercial experience, I've completed small and large projects with my team. Currently I'm working on enhancing the functionality and user experience of Payeer app through migration to a new framework.

I am a strong team player seeking a dynamic company that values innovation, collaboration, and growth. I am eager to contribute to meaningful projects while continuing to learn and grow, striving towards shared goals with my team.

Professional Experience

Textura Agency, Warsaw   December, 2021 — Present time

Technologies

Vue3, Typescript, HTML, CSS, SCSS, pinia, REST API

Responsibilities and tasks:

- Integrating backend functionality into projects for seamless user experience
- Creating complex and clean templates utilizing BEM methodology
- Developing adaptive and responsive layouts for optimal viewing across devices
- Establishing global style configurations, adding SCSS mixins and functions
- Participating in rigorous code review process to ensure high-quality codebase
- Collaborating with team to effectively achieve project goals and deliver results
- Assisting with task prioritization and estimation to meet project deadlines
- Providing guidance and support to novice developers, helping them understand the fundamentals and succeed in their tasks.

AndersenLab, Warsaw   June, 2022 — November, 2022

Technologies

Angular, Typescript, HTML, SCSS, RxJS, Git

Responsibilities and tasks:

- Successfully delivering complex tasks and ensuring test coverage
- Conducting large-scale refactoring of codebase for improved performance and scalability
- Collaborating with the backend team to determine endpoints and data formats
- Providing support and assistance to team members in resolving issues and optimizing solutions
- Participating in code review process to maintain code quality and consistency
- Leading the frontend team of 4 developers by guiding their work and promoting collaboration
- Participating in key project management activities such as sprint planning, demo sessions, and retrospectives.
